New York Stock Market.

New York, April 17.

The Commercial says: The Stock market exhibits rather more animation, with a general improvement in prices. The Railroad list is decidedly firm, but without any important speculation or activity. Governments are strong, but rather less active. About a million and a half dollars of old 5-20's were returned by the two last steamers, but the price has strengthened notwithstanding. Ten-Forties sold at \$22.5 Seven-Thirties are firm, but less active at yesterday's figures. Money continues very abundant, owing principally to the large receipts of currency from the interior, and also to the moderate demand for loans. Demand loans are severally made at 5 \(\pi\) cent. Outstanding six per cent. loans have been mostly paid in and renewed at lower rates. Discounts are moderately active. There is a brisk demand for prime paper, which is scarce. Foreign Exchange shows a slight reaction from the firmness of yesterday. Some of the leading drawers ask 10s for 60 days' standing, while others offer their bills at 107%, which is about the views of most, buyers. Gold is in active demand from importers; at the same time the borrowing demand for shorts is quite active, 1/4 per day being generally paid for loans. NEW YORK, April 17.
